Voo Doo Announces R. C. Casselman As General Manager

Vol. XXI Staff Named At Banquet Held Saturday

Present Staff Called Sissies For Not Pepping Up Old Feud

Aiding Casselman Are Voageley, Wingard, Pulver, Griffin As New Board

Robert C. Casselman, '39, will be general manager of volume XXI of Voo Doo, the so-called humor magazine, according to an announcement made at the annual Voo Doo banquet held Saturday evening, Jan. 15, at the Copley Square Hotel. Supporting Casselman are William F. Wingard, '39, business manager, Arthur W. Voageley, '39, managing editor, and William F. Pulver, '39, and Gus M. Griffin, '39, as advertising managers.

The guest speaker of the evening was Chick Kane, art editor of Voo Doo in 1923 and 1924. After reminiscing for a few minutes, Mr. Kane came to the conclusion that the present staff of Voo Doo were "sissies" for they were not carrying on in the for-

Nautical Association Views Colored Movies Of Last Year's Races

Pictures Described Handling Of Skiffs, Dinghies, Larger Boats

Several reels of colored movies of last year's Cup Races were shown at a meeting of the Nautical Association held last Sunday in the Eastman Lecture Hall.

The movies were taken by Mr. Frank H. Conant of Tech's Photographic Department who described the action in the film. The pictures started with skiffs and ran up through the Tech dinghies to larger boats to the Cup defenders. By this means there was an attempt to show how young men get their training in seamanship from the bottom up.

High spots on the program were the action shots of the trials at Marblehead and the real races at Newport. At Marblehead Mr. Conant took his pictures from three places: on board a coast guard cutter, from the Yankee and from the Rainbow. This furnished some very thrilling scenes.

The films of the actual races at Newport were taken from on board the coast guard cutter detailed to keep the course clear. Since the race was of the windward-leeward type, the shots of the contenders on the back stretch under full sail were breathtaking to say the least.

Works of Rockport Artists Exhibited

An exhibition of the works of the resident Rockport artists of the Cambridge School of Architecture and Landscape Architecture will be held at the school, 53 Church Street, Cambridge, between January 17 and 29. An invitation has been extended to all students of the Institute who wish to attend.

The exhibition will be hung by Samuel Hershey and will include some of the work of Parker Perkins, Aldro T. Hibbert, Henrik and Claire Twardzik, and others.

Scientific Show Scheduled Today

"Previews of Progress" To Be Shown This Afternoon In Room 10-250

A special performance of "Previews of Progress," arranged especially for Technology will be given this afternoon at 4 o'clock in Room 10-250. Realizing the difference between the ordinary audience and the one at such an institution as Technology the representatives of General Motors have made changes in the ordinary presentation of "Previews of Progress." According to "Boss" Kettering, Chief of the General Motors Laboratories, the show will then have greater appeal to the Tech man.

Interesting Scientific demonstrations have been gathered together in "Previews of Progress," such as black light, static electricity, stroboscopic effects, and the oscillograph. Most Tech men have probably seen at one time or another one of the

Ex-Governor Ely Cannot Appear At Tech Open Forum

Professor Meriam of Harvard Will Oppose Mr. Eliot On Government

Regulation of Business is Topic

Ex-Governor Joseph B. Ely notified the Tech Open Forum leaders last night that unexpected circumstances would prevent his appearing at the meeting of the Forum this afternoon at five in Eastman Lecture hall.

The Forum has secured Professor Ralph S. Meriam of the Harvard Business School, noted authority on business management and economics to take the side of the discussion which was to have been given by Mr. Ely. Mr. Thomas H. Eliot, a member of the Littauer School of Administration of the Harvard Graduate School, and a former chairman of the National Social Security Board will take the opposite side of the discussion. The topic is "What are the Proper Limits of Federal Regulation of American Economic Activity?" Dr. Meriam will urge a moderate policy

THE TECH Inquires

Question: Do you think there should be a reading period before examinations?

Lawrence M. Levinson, '39, VI-C, M. I. T. Dormitories

I am in favor of the present system of holding exams immediately after the end of the term. The amount of work which would be done at Technology during a reading period is questionable.

Richard W. Smith, Jr., '40, VII, 109 Common St., Walpole

No. I could not apply my time to the best of advantage.

Louis F. DuBois, '38, XV2, M. I. T. Dormitories

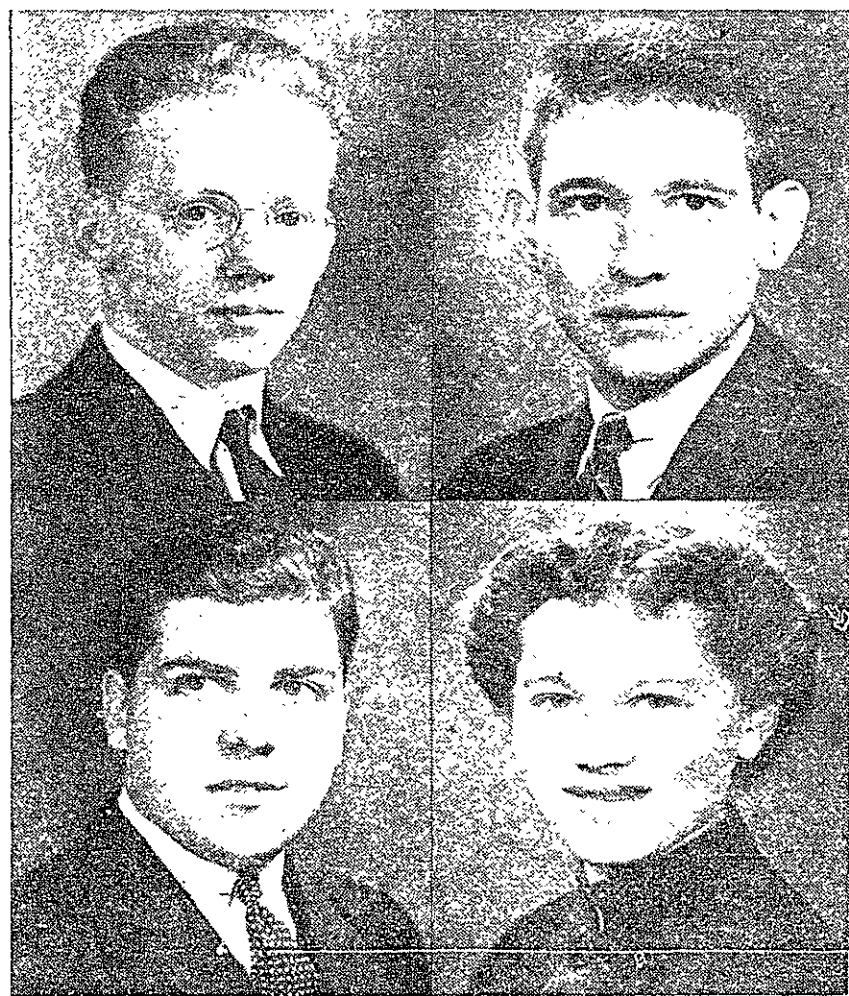

A reading period would be a fine thing before exams. Everyone knows that the best skiing comes in late January.

William G. Peck, '40, VIII2, M. I. T.

Snow Train To Go Early Next Term

Opportunity For Enthusiasts Of Winter Sports Provided

Tickets went on sale today in the Main Lobby for the snow train which is scheduled to leave on February 13. Although a train will be dispatched in any case on that date, if a total of 300 tickets are sold, a private train solely for Tech winter sports enthusiasts will be run.

The train's destination is Plymouth, N. H., where there are ski trails and nine toboggan slides.

Members of the Beaver Key Society in conjunction with the Faculty Club and Outing Club have made the arrangements for the expedition, in particular for instruction for beginners at skiing. Professor E. A. Hauser, of the Chemical Engineering Department, and former Austrian Olympic skiing expert, will be on hand to instruct the amateurs.

The committee in charge is as follows: Stuart Paige, '39; Professor Hauser; Professor E. D. Douglas; Rolland S. French, '38; Maynard K. Drury, '39; Robert C. Casselman, '39; Morris E. Nicolson, '39, and Ryder Pratt, '39.

Ernest Hauser Talks On Colloidal State

Demonstrates Solidification Of Colloid on Jarring

Ernest Hauser, Associate Professor of Chemical Engineering, gave a speech, accompanied by demonstrations, on "Physics and Chemistry of Matter in the Colloidal State" at a Society of Arts Lecture Sunday at 4:00 in Room 10-250.

Among his demonstrations was a colloidal solution of a clay compound, which when jarred would turn solid and when shaken would liquify. Professor Hauser explained that this principle is used with rock drills. When the drill is not in use, the solution will gel about it, protecting it from rocks. As soon as the drill is put in use, the gel will turn to liquid and run off.

Another exhibition showed the comparative strength of stretched and unstretched rubber. A sample of each was frozen and then jarred. The unstretched rubber shattered and the stretched rubber broke into tough fibers.

Smith, Dadakis, Fabens, Rovno Comprise The Board

Rovno Is Associate Editor; First Coed To Be On Board

Junior Board Elections Also Announced at Banquet Last Friday

General Manager of Volume LVIII of The Tech will be David A. Bartlett, '39, it was announced last Friday evening at the annual banquet of The Tech, held at the Hotel Bellevue. Additional elections to the senior board include Edwin K. Smith, Jr., '39, as managing editor; George Dadakis, '39, business manager; A. Lawrie Fabens, '39, editor; and Ida Rovno, '39, associate editor.

Richard G. Vincens, Jr., '38, acted as toastmaster and introduced Mr. J. J. Rowlands, director of the news service of the Institute, who explained how Technology's publicity is handled. Featured speaker of the evening was Henry G. Pearson, Jr., formerly of the Harvard Crimson and now work-

Aeronautical Thesis Can Win Means Prize Of 100 Dollars Cash

Any Application to Aeronautics Is Permissible in James Means Contest

One hundred dollars in cash will be awarded for the best thesis submitted on an aeronautical subject by a candidate for a degree in Bachelor of Science in the class of 1938. This is the annual James Means prize and will be presented during the Commencement Exercises in June.

"An aeronautical subject is considered to include any application of science to aeronautics whether in the immediate field of aircraft design and construction, engines, instruments and accessories, or in the application of physical, chemical, or mathematical science to the art of flight.

Abstracts of the theses must be presented in Room 3-173 before the first of May, together with a brief explanation of their aeronautical applications. The Committee on Award of the James Means Prize consists of Professors Jerome G. Hunsaker, George W. Swett, C. Fayette Taylor, and Richard H. Smith.

French Consul Talks To 'Cercle Francais'

Francois Briere, French Consul in Boston spoke before the "Cercle Francais" at a meeting yesterday.

The meeting was opened with a few introductory remarks by Raymond Samuel, G., who in turn introduced the Consul. M. Briere spoke on the advisability and necessity of a French Club at the Institute. After this lecture, Professor Langley was elected Honorary President of the club.

After Professor Langley had been elected, and some organization details had been ironed out, Lucien Lievre, a lawyer from Paris, compared the life of a student in Paris with that of a student in the United States.

PROGRESS

SOCIAL AS WELL AS SCIENTIFIC

AT TECHNOLOGY, two kinds of students are preparing for a life in science. On the one hand, there is the research worker, planning to spend his life in a secluded laboratory seeking elusive and obscure truths. On the other, there is the professional man, adapting scientific skills to the achievement of certain mundane ends—money, honor, power.

The first man cares little for these material rewards for his inquisitive ability. He is satisfied to live frugally, spurred by an intense curiosity and a zeal for knowledge. The second, though his standards of truth may be equally high, desires to capitalize his scientific talents.

Noticeably lacking in both is social consciousness. For the research man has little power to apply his findings, while the business man, as long as he satisfies his conscience, considers only the economic value of scientific discoveries, and uses them to obtain the greatest profit possible. Technological displacement by labor saving machinery is only one example of this phenomenon.

Despite these obstructions, scientific progress has been accompanied by social betterment, and, as General Motors says in the pamphlet advertising its "Previews of Progress" to be presented at the Institute this afternoon, without scientific research "we would still be living in the world of fifty or a hundred years ago."

No one can deny this statement, but we also cannot deny that great advances in medicine have not prevented malnutrition and diseases directly traceable to poverty. Newspapers last Sunday carried staggering figures on illness in the United States; 16,000,000 Americans are ill every day. And too, no one can deny that great advances in chemistry, biology, physics and engineering have increased rather than decreased wasteful destruction such as is taking place in Spain and China now.

The reason for this enigma rests not in science or in the scientist who, for the most part, is sincerely interested in applying his discoveries for the good of humanity, but in the short-sightedness of engineers who work for transient efficiency as opposed to long-term economy, and in the selfishness of the men who encourage war.

Social progress should keep with scientific progress, the engineer should be taught to place human values on technical innovations, and economic institutions should be revamped so that they are receptive to such advances. This move must originate at scientific institutions like Technology, where the future engineers and scientists may learn that they have social as well as professional duties to perform.

STUDY FOR EXAMS

INTELLIGENTLY

HALF of the fight to pass the examinations next week is already past; what remains can be rated mostly as efforts toward getting ready to put down what has been learned during the term. It is true that many students improve their standings by being entirely on the job during the last few weeks. Studying can not be neglected, but one of the most important factors in writing examinations is good health.

The week of examinations should be approached much as a football trainer approaches a big game, both from a physical and from a mental point of view. The main object should be to walk into the room in tip-top condition, mentally cool and psychologically at ease. That is the only way one can do his best. If you know the subject cold or not, your mind will be able to coordinate better and to understand the data given in the questions if you are in good shape physically. If you are jittery, or sleepy you can not hope to do your best.

Three important factors govern one's health: food, exercise, and sleep. All of them must be considered by anyone who hopes to get the breaks in his examinations. Simple wholesome food such as is served to athletic teams will digest most easily, and not bring on the danger of digestive troubles. Midnight hot-dog lunches are a risk that should be avoided at this critical time of the year. Adequate physical exercise is very important, and if one works up a good sweat and then takes an invigorating shower it may suffice him for all day.

Many students seem to have almost no idea of the value of sleep. It is very poor economy to cram all night and then sleep in class or during an exam. There is usually some amusement period that can be cut down during this time, and without adequate sleep all the studying imaginable is of little avail.

Examinations are the climax and one of the largest parts of many courses, and for this reason every care should be taken to see that they will be representative of the best work the student is capable of doing. As far as the subject matter is concerned, studying can not be ignored, but it must not dominate so much that it ruins one's health of body and mind.

Reviews and Previews

METROPOLITAN—Tuesday evening in addition to the regular showing of *Tovarich* with Charles Boyer and Claudette Colbert there will be a special preview of *The Buccaneer*, the story of Jean Lafitte, pirate, patriot, and adventurer, who saved the United States in the War of 1812. Cecil B. DeMille will make a special personal appearance on the stage to introduce the film. Thursday *Hollywood Hotel* arrives, starring Dick Powell, Frances Langford, and Benny Goodman's orchestra.

PARAMOUNT AND FENWAY—Starting Thursday *Love and Hisses* will continue the feud between Walter Winchell and Ben Bernie in addition to starring Simone Simon and Bert Lahr. Thank You, Mr. Moto is also on the bill, depicting the adventures of the famous Oriental detective.

SCOLLAY AND MODERN—Walter Wanger's picture *Stand-In* is a Hollywood picture to end Hollywood pictures, starring Joan Blondell and Humphrey Bogart. Co-feature is *Thrill of a Lifetime* with the Yacht Club Boys, Judy Canova, Ben Blue, Betty Grable, and Dorothy Lamour.

UNIVERSITY—Today Leslie Howard and Joan Blondell are co-starred in *Stand-In* while John Beal and Sally Eilers are playing in *Danger Patrol*. Tomorrow is *Review Day* with Gary Cooper in *Lives of a Bengal Lancer* and Will Rogers in *Handy Andy*.

REPERTORY AND SQUARE—Pat O'Brien plays in *China Clipper* and Leslie Howard and Bette Davis perform in *Of Human Bondage*. Starting Wednesday is the English picture *Nine Days a Queen* together with Gene Raymond and Ann Southern in *Smartest Girl in Town*.

TREMONT—William Powell and Myrna Loy in *Manhattan Melodrama* and Errol Flynn and Kay Francis in *Another Dawn* are playing now. Starting Thursday are Jeanette MacDonald and Nelson Eddy in *Rose Marie* and Merle Oberon and Charles Boyer in *Thunder in the East*.

EXETER—Leslie Howard and Joan Blondell are playing in *Stand-In* together with Jean Parker and Douglas Montgomery in *Life Begins with Love*. The last half of the week Jessie Mathews and Nat Pendleton will be seen in *Gangway* along with Gladys George and Warren William in *Madame X*.

ing on the free community newspapers in suburban Boston. Mr. Pearson discussed freedom of the press and reasons for voluntary censorship.

New Junior Board

Elections to the new junior board for volume LVIII were as follows: William S. Kather, '40, desk editor; Wylie C. Kirkpatrick, '40, assignments editor; Robert K. Deutsch, '40, advertising manager; Leslie A. Sutton, '40, circulation manager; John W. Blattenberger, '40, treasurer; Ruth A. Berman, '40, features editor; I. Seth Levine, '40, filing and associate features editor; John G. Burr, '40, sports editor; Robert K. Prince, '40, photographic and associate desk editor, and Phelps A. Walker, '40, personnel manager. At the same time the election of Paul W. Witherall, '40, and Robert S. Nelson, '40, to the position of advertising associates was announced.

David Albert Bartlett, the new general manager of The Tech is a member of Course III and of Alpha Tau Omega fraternity. In addition to his journalistic activities he is manager of the crew, a member of Gridiron, the honorary publications society, a member of Beaver Club, honorary society of the Junior Class, Beaver Key Society, Boat Club, and alternate member of the Junior Prom Committee. He comes from Marietta, Ohio.

First Coed Reaches Senior Board

Ida Rovno, associate editor for volume LVIII, is the first coed who ever reached the senior board. In addition to her work as features editor in volume LVII she has done work for the Boston Post. She is a member of Course V.

Beaver Pucksters Win From Bowdoin But Lose To Colby

Friday Victory Follows Wins Over Brown, N. U., Army This Season

Bowdoin Game Lead Put On Ice In Last Period by Engineers

Weekend Victory Gives Tech Its Best Record In Years

Swamping Bowdoin by the score of 6-2 on Friday, and then being nosed out by Colby in an overtime period by the tune of 4-3 on Saturday, the Beaver hockey team rounded out the first half of a season, already its best in years. The Bowdoin win, coming on the heels of victories over Brown, Northeastern, and Army, gave the Engineers more victories than they had made in all the games of the past two seasons.

After a first period tally by Arnold of Bowdoin, Tech scored twice in the second canto, the first goal coming from Eddy unassisted, and the second made by Grace on a pass from Hilliker. The third period saw the ice practically melting under the heated scoring, with Tech pushing the rubber past the nets on four occasions.

Minott started the spree on Acker's

Hockey

Frosh Basketeers Put Two Games On Ice Over Weekend

First Year Men Squeak by Tabor On Saturday After Win In Bridgeton

Varsity Squad Beaten by Colby

Pulled through by two freshmen victories, the net result of the three basketball games played over the weekend by the freshman and varsity basketball teams left the Institute men on the long end of a two to one decision.

Led by Samuels, the ace freshman basket sinker who thus far has scored 68 points this season, the frosh squad squeezed out Bridgeton on Friday by a 24-23 score, and nipped Tabor Saturday.

(Continued on page 4)

Basketball

Roxbury Latin Frosh Beat Team From Tech

Institute '41'ers Squeezed Out By Two Point Margin In Fast Meet

The first freshman track meet of the season, nip and tuck battle with Roxbury Latin School, resulted in the Tech men being nosed out by a score of 32½ to 30½. This defeat was far from a disgrace, considering the narrow margin of defeat and the noteworthy performances turned in, among which were Nagle's mark of 5 feet, 9¼ inches in the high jump and the fast times in the 50, 300, and 600.

This Thursday the frosh will meet their next opponents as Huntington School brings their squad here to compete on our board track. Our runners, profiting by the experience of their first meet, should win this time.

Tech Swimmers Beaten By Wesleyan Natators

Despite wins in the four hundred yard relay, the dives and the one hundred yard dash, the Beaver natators were defeated Friday evening by Wesleyan by the score of 46 to 29 in the University Club pool. The relay team, composed of Gardner, Wheeler, Braner, and Schuler, scored in four minutes, four seconds flat, equaling the Institute record. Schuler won the hundred yard event in 59.8 seconds.

assist. A while later Acker scored on his own. Hilliker tallied next for the Engineers, while a goal by Eddy brought the count up to 6-2 for the Engineers, Arnold having sneaked the disc past Carnrick for Bowdoin.

In the Colby game the fighting spirit of the Engineers as shown by the fact that they came up from behind the victors on three occasions, was not quite enough to make it five straight for the Institute. After a scoreless first period, Walker of Colby started the scoring for the visitors. Hilliker soon tied it up, assisted by Drury. With a Colby score early in the third session, followed by a tying Tech tally by Grace on Drury's pass, an overtime period was in order.

Colby took an early lead in the overtime only to be tied by Tech on a tally by Minott, assisted by Acker. Walker of Colby, spearhead of the visitors' attack throughout the game, scored to give Colby a 4-3 win.

Basketball

(Continued from page 3)

urday 19 to 17. This leaves the frosh with a spotless record to date.

The record shines all the more in view of the fact that the Bridgeton team has four allstate men in the lineup. The Tabor game was won in the last minutes of play, in fact in the last half minute of play, by two foul shots sunk by Samuels.

The varsity men put up a game fight against Colby, Saturday; but were sent to the showers by a second period onslaught which ended the game 44 to 33 in favor of Colby. The score at the half was 18 to 12 as the result of a listless twenty minutes of play. Colby clicked in the second half, and became too hot for the Tech men to handle.
